

Emission Sources - Maximum Allowable Emission Rates

Permit Number 19871 and PSDTX1236

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission Sources - Maximum Allowable Emission Rates

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
 - NO_x - total oxides of nitrogen
 - CO - carbon monoxide
 - PM - particulate matter, suspended in the atmosphere, including PM₁₀
 - PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
 - SO₂ - sulfur dioxide
 - EDC - ethylene dichloride
 - HCl - hydrogen chloride
 - Cl₂ - chlorine
 - NaOH - sodium hydroxide
- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Includes losses from MEG ship and barge loading and DEG barge loading.
- (7) Emissions are authorized for these tanks and for these flares but both emissions and EPNs need to be deleted once the installation and operation of Flare (EPN 8F-D06) is completed.
- (8) These emissions are to commence upon installation and completion of Flare (EPN 8F-D06).
