

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 6195A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY
1	Rock Crushing/Material Handling (4)	PM	9.81	14.76
		PM ₁₀	4.68	7.03
FE-1	Stockpiles (4)	PM	-	14.46
		PM ₁₀	-	6.89

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter, suspended in the atmosphere, including PM₁₀
PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

14 Hrs/day 6 Days/week 50 Weeks/year or 4,200 Hrs/year

Based on a maximum hourly production rate of 1,000 tons and a maximum annual production rate of 3,000,000 tons of rock crushed.
