

## Emission Sources - Maximum Allowable Emission Rates

Permit Number 17833

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Annual emission rate is based on 3,120 hours per year of landfill activity.
- (7) All metals from the FBI/Scrubber System Stack are in particulate matter form. Total emissions of all metals are limited by the PM, PM<sub>10</sub> and PM<sub>2.5</sub> emission rates.
