

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 5698

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY
Area Unload	Fugitives from Lignite/Coal Unloading/Storage Area	PM	40.0	33.7
		PM ₁₀	20.0	16.9
Area	Fugitives from Conveyors 9, 10, 11, and Economizer Ash Silo**	PM	15.3	9.7
		PM ₁₀	8.3	5.0
DC-3, 4, and 5	Fugitives from Dust Collectors	PM	0.7	3.0
		PM ₁₀	0.4	1.5

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) PM - particulate matter, suspended in the atmosphere, including PM₁₀
PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

Maximum Lignite/Coal Throughput Rates:

4,000 tons/hour 6,748,718 tons/year for "Area Unload"

1,400 tons/hour 4,971,300 tons/year for "Area"

** Fugitive emissions from the economizer ash silo were previously authorized under permit by rule 30610

Dated July 23, 2002
