

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 21050

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

| Emission<br>Point No. (1) | Source<br>Name (2) | Air Contaminant<br>Name (3) | Emission Rates ** |      |
|---------------------------|--------------------|-----------------------------|-------------------|------|
|                           |                    |                             | lb/hr             | TPY* |
| SO-1                      | Scrubber Stack     | Cr <sup>+6</sup>            | 0.005             | 0.01 |

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources, use an area name or fugitive source name.

(3) Cr<sup>+6</sup> - hexavalent chromium

\* Compliance with annual emission limits is based on a rolling 12-month period.

\*\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

16 Hrs/day 5 Days/week 52 Weeks/year or 4,160 Hrs/year

A maximum of 14,000 amperes per hour and 58,240,000 amperes per year.

Dated May 2, 2003
