

Emission Sources - Maximum Allowable Emission Rates

Permit Number 22914

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
HCl - hydrogen chloride
H₃PO₄ - phosphoric acid (in aqueous solution)
H₂SO₄ - sulfuric acid (in aqueous solution)
NaOH - sodium hydroxide (in aqueous solution)
CRA - cresylic acid
PM₁₀ - particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
FeCl₂ - ferrous chloride
FeCl₃ - ferric chloride
NO_x - nitrogen oxides
CO - carbon monoxide
SO₂ - sulfur dioxide
NaSi - sodium silicate (in aqueous solution)
TiO₂ - titanium dioxide (in aqueous solution)
CO₂ - carbon dioxide
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
