

# Emission Sources - Maximum Allowable Emission Rates

Special Permit Number 18164

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.

Emission Sources - Maximum Allowable Emission Rates

(5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.

(6) Minimal emissions due to 8 to 10 percent moisture in the material during normal operations.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:  
7,884 Hrs/year
