

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Nos. 34824 and PSD-TX-877

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification - either specific equipment designation or emission point number (EPN) from plot plan.
 - (2) Specific point source name. For fugitive sources use area name or fugitive source name.
 - (3) VOC - volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1
NO_x - total oxides of nitrogen
CO - carbon monoxide
SO₂ - sulfur dioxide
PM₁₀ - particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
 - (4) Turbine oil mist vent emissions are an estimate only based on estimates from mist vent eliminator manufacturer data.
 - (5) Annual emission rates for Auxiliary Boilers (EPNs 103 and 104) are based on continuous operation at 10 percent load. Any emissions above the annual allowable emission rates listed shall be offset by an equal or greater reduction in annual emissions from one or both Turbine and Duct Burner Units (EPNs 101 and/or 102).
 - (6) Emissions are based on normal operation of 100 operating hours per year.
 - (7) Fugitive emissions are an estimate based on component count and applicable fugitive emission factors.
 - (8) Cooling tower PM₁₀ emissions are an estimate only based on manufacturers test data.
 - (9) Cooling tower organic emissions are based on engineering estimates and calculations of compound stripability. After six months of commercial operation, permit holder shall submit an alteration/amendment request, as appropriate, to reflect the emission rates based on data collected in accordance with Special Condition No.15. **(7/00)**
- * Emission rates are based on an operating schedule of 8,760 hours/year.
- ** Compliance with the annual emission limits shall be based on a rolling 12-month year rather than the calendar year.
