

## Emission Sources - Maximum Allowable Emission Rates

Permit Number 4041C

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates (6) *	
			lbs/hour	TPY
1	Material Handling (4)	PM	0.96	0.81
		PM <sub>10</sub>	0.45	0.38
2	Central Baghouse (5)	PM <sub>10</sub>	0.56	0.67
3	Stockpiles (4)	PM	--	0.12
		PM <sub>10</sub>	--	0.06

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented  
PM<sub>10</sub> - total particulate matter equal to or less than 10 microns in diameter, including PM<sub>2.5</sub>, as represented
- (4) Fugitive emissions are an estimate only.
- (5) Sources vented to central baghouse include the cement/fly ash weight hopper, batch drop point, fly ash silo, and the cement 2-compartment (split) silo.
- (6) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

8 Hrs/day 6 Days/week 50 Weeks/year or 2,400 Hrs/year  
 Maximum Hourly Production: 250 Cubic yards/hour  
 Maximum Annual Production: 425,000 Cubic yards/year

Date: January 31, 2013
