

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 22332B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter.

Where PM is not listed, it shall

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

be assumed that no PM greater than
10 microns is emitted.

VOC - volatile organic compounds as defined in the 30 Texas
Administrative Code Section 101.1

NO_x - oxides of nitrogen

SO₂ - sulfur dioxide

CO - carbon monoxide

(4) Fugitive emissions are an estimate only and should not be
considered as a maximum allowable emission rate.

* Emission rate based on use of natural gas as fuel for the dryer.

** Emission rate based on use of first run No. 2 or No. 4 fuel oils for
the dryer.

*** Emission rates are based on and the facilities are limited by the
following maximum operating schedule and production rates:
