

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 18153

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
 PM - particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}
 NO_x - total oxides of nitrogen
 CO - carbon monoxide
 SO₂ - sulfur dioxide
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) The VOC emission rates shown for each of the three emission points represents the total maximum emission rate from all three emission points.
- (6) Emission rate is an estimate and is enforceable through compliance with the applicable special conditions and permit applicable representations.
- (7) EPN T7-OG provides the cumulative annual VOC emission limit for EPNs EV-270(1), EV-270(2), EV-270(3), EV-204, EV-271, and EV-273.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day 7 Days/week 52 Weeks/year or Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.
