

# Emission Sources - Maximum Allowable Emission Rates

Permit Number 112114

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission Sources - Maximum Allowable Emission Rates

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.
- (7)  $\text{NH}_4\text{Cl}$ ,  $\text{ZnCl}_2$ ,  $\text{ZnO}$ ,  $\text{Zn}$ , and  $\text{NH}_3$  emissions are included in the particulate matter.
