

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number S-17891

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates *	
			lb/hr	TPY**
33A	Fly Ash Silo B Bag Vents	PM	1.71	7.51
FASN-FUG	Fly Ash Silo B Unloading	PM	0.14	0.08
		PM <sub>10</sub> 0.07	0.04	

- (1) Emission point identification - either specific equipment designation or emission point number.  
 (2) Specific point source name. For fugitive sources use area name or fugitive source name.  
 (3) PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub>  
 PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.

\* Emission rates are based on and the facility is authorized to the following:

Operating Schedule: 24 hrs/day 7 days/week 52 weeks/year or 8,760 hrs/year.

Maximum ash unloading rate: 720 tons per hour and 810,000 tons per year.

\*\* Compliance with the annual emission limits shall be based on a rolling 12-month year rather than the calendar year.

Dated October 28, 2005
