

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 36163

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	AirContaminant Name	<u>Emission Rates *</u>	
			(3)lb/hr	TPY**
E1	Baghouse Stack	PM ₁₀	0.03	0.11

(1) Emission point identification - either specific equipment designation or emission point number from a plot plan.

(2) Specific point source names. For fugitive sources use area name or fugitive source name.

(3) PM₁₀ - particulate matter (PM) equals to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

* Emission rates are based on and the facilities are limited by the following operating schedule and maximum production rate:

24 Hrs/day 7 Days/week 52 Weeks/year or 8,760 Hrs/year

Total Facility: 50 tons per hour and 17,504 tons per year

** Compliance with annual emission limits is based on a rolling 12-month period.
