

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 6224G

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification - either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
NO_x - total oxides of nitrogen
CO - carbon monoxide
SO₂ - sulfur dioxide
PM - particulate matter, suspended in the atmosphere, including PM₁₀
PM₁₀ - particulate matter equal to or less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only.
- (5) Includes RAP crusher

- * Emission rates are based on and the facilities are limited by the following maximum operating schedule and production:

10 Hrs/day 5 Days/week 50 Weeks/year or 2,500 Hrs/year

Facility is limited to 350 tons/hr not to exceed 186,000 tons/year of standard hot mix asphalt concrete.

- ** Compliance with annual emission limits is based on a rolling 12-month period.
