

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 72763

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	<u>Emission Rates *</u>	
			lb/hr	TPY**
T1001	Storage Tank 1001	VOC	1.91	5.19
T1002	Storage Tank 1002	VOC	1.91	5.19
T41913	Storage Tank 41913	VOC	1.91	5.19
T1001 thru T41913	Emission Cap (4)	VOC HAPs (5)		7.95

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1.
HAP - hazardous air pollutant (HAP) emissions are included in the VOC emissions and consist of 2,2,4 - trimethylpentane, benzene, ethylbenzene, hexane, toluene, and xylene.
- (4) The combined emissions from Tanks T1001 thru T41913 are limited to the Emission Cap of 7.95 tons per year (TPY) of VOC.
- (5) The combined emissions of all sources of hazardous air pollutants (HAPs) at this site are limited to less than 10 TPY of any single HAP and less than 25 TPY of any combination of aggregate HAPs. Records of the speciated HAP emissions will be maintained on-site to confirm that this requirement is being met on a rolling 12-month basis.

* Emission rates are based on and the facilities are limited by the following maximum operating schedule:
8,760 hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.

Date: September 29, 2011
