

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 83260

This table lists the maximum allowable emission rates and all sources of air contaminants covered by this permit.

AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates	
			lb/hr	TPY (4)
EPN 1, 2, and 3	Paint Booth, Makeup air heater, Equipment cleanup, and Precoating wipedown	VOC	81.40	19.40
		PM	0.15	0.08
		Exempt	35.00	16.51
		NO _x (5)	0.27	1.18
		CO(5)	0.23	0.99
		VOC(5)	0.01	0.07
		SO ₂ (5)	< 0.01	0.01
		PM(5)	0.02	0.09
All Emission Points	All Facilities	Individual HAP		<10.00
		Total HAPs		<25.00

- (1) Emission point identification - either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) CO - carbon monoxide
Exempt - volatile organic compounds excluded from the definition of VOC.
HAP - hazardous air pollutant as listed in Title 40 Code of Federal Regulations Part 60, Subpart C.
NO_x - total oxides of nitrogen
PM - particulate matter, suspended in the atmosphere, including PM₁₀
PM₁₀ - particulate matter equal to or less than 10 microns in diameter.
SO₂ - sulfur dioxide
VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1.
- (4) Rate is for a rolling 12 consecutive months.
- (5) Products of Combustion.
- (6) These HAP limits are being included so that a Title V permit is not required, but due to EPA's once-in, always-in policy the requirements of 40 CFR Part 63, Subpart M (Surface Coating of Miscellaneous Metal Parts and Products) remain applicable since the compliance date for a new affected source is the initial date of startup (initial) of the source and the compliance date passed without inclusion of an enforceable HAP limit in the permit.
