### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit Number 46728

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

#### AIR CONTAMINANTS DATA

| Emission      | Source                        | Air             | Contaminant | Emission Rates * |       |
|---------------|-------------------------------|-----------------|-------------|------------------|-------|
| Point No. (1) | Name (2)                      |                 | Name (3)    | lb/hr            | TPY** |
|               |                               |                 |             | '                | _     |
| EPN 10        | Baghouse Stack                |                 | VOC (a)     | 12.80            | 9.28  |
|               |                               | VOC             |             | 153.13           | 7.66  |
|               |                               | PM              | 13.20       | 9.86             |       |

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1.

VOC (a) - hot mix VOC (b) - cold mix

PM - particulate matter, suspended in the atmosphere, including PM<sub>10</sub>.

PM<sub>10</sub> - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

NO<sub>x</sub> - total oxides of nitrogen

SO<sub>2</sub> - sulfur dioxide

CO - carbon monoxide

- (4) Fugitive emissions are an estimate only.
- (5) Includes RAP crusher
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

\_\_\_\_\_24\_ Hrs/day \_7\_ Days/week \_52\_Weeks/year or \_8,760\_ Hrs/year

Maximum Throughput For Standard Mix: <u>400</u> tons per hour (tph) and <u>580,000</u> tons per year (tpy).

Maximum Throughput For Cold Mix: <u>175</u> tph and <u>17,500</u> tpy.

\*\* Compliance with annual emission limits is based on a rolling 12-month period.
