#### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

### Flexible Permit Numbers 77679 and PSD-TX-1061

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

	listed, it shall be assumed that no PM greater than 10 microns is emitted.  H <sub>2</sub> SO <sub>4</sub> - sulfuric acid mist  HCl - hydrogen chloride  NH <sub>3</sub> - ammonia  PB - lead
(4)	Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
*	Emission rates are based on and the facilities are limited by the following maximum operating schedule:
	Hrs/dayDays/weekWeeks/year or _8,760_Hrs/year
**	Compliance with annual emission limits is based on a rolling 12-month period.
