## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit Number 6113

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## AIR CONTAMINANTS DATA

| Emission      | Source                       | Air Contaminant |           | <b>Emission Ra</b> | Emission Rates * |  |
|---------------|------------------------------|-----------------|-----------|--------------------|------------------|--|
| Point No. (1) | Name (2)                     |                 | Name (3)  | lb/hr              | TPY **           |  |
|               |                              |                 |           |                    |                  |  |
| FL-1          | Flare (5)                    |                 | CO        | 2.03               | 1.19             |  |
|               |                              |                 | $NO_x$    | 0.51               | 0.30             |  |
|               |                              | $SO_2$          | 0.01      | 0.01               |                  |  |
|               |                              | VOC             | 0.39      | 1.68               |                  |  |
| H-501         | Crude Unit Heater            |                 | СО        | 0.0                | 0.0              |  |
|               |                              | $NO_x$          | 0.0       | 0.0                |                  |  |
|               |                              |                 | $PM_{10}$ | 0.0                | 0.0              |  |
|               |                              | $SO_2$          | 0.0       | 0.0                |                  |  |
|               |                              | VOC             | 0.0       | 0.0                |                  |  |
| L-2           | Uncollected Loading Losses   |                 | VOC       | 0.0                | 0.0              |  |
| FUG           | Loading Rack Process Fugiti  | ves (4          | )<br>2.73 | VOC                | 0.62             |  |
| FUG-1         | Crude Unit Process Fugitives | s (4)           | VOC       | 5.41               | 23.70            |  |

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) CO carbon monoxide
  - NO<sub>x</sub> total oxides of nitrogen
  - $PM_{10}$  particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be
    - assumed that no particulate matter greater than 10 microns in emitted.
  - SO<sub>2</sub> sulfur dioxide
  - VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Emissions from collected tank truck loading operations are sent to this flare from this permitted facility.
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52

\*\* Compliance with annual emission limits is based on a rolling 12-month period.
