### Permit Numbers 26002 and PSD-TX-888M1

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission	Source	Air Contaminant <u>Emission Rates *</u>		n Rates *

#### AIR CONTAMINANTS DATA

Emission	Source	Air	Contaminant	Emission Rates *	
Point No. (1)	Name (2)		Name (3)	lb/hr	TPY
PB-1	Paint Booth		PM <sub>10</sub>	1.22	2.67
		VOC	1.18	2.58	
PB-2	T and G Paint Booth		PM <sub>10</sub>	0.65	1.42
		VOC	1.46	3.19	

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM particulate matter, suspended in the atmosphere, including PM<sub>10</sub>
  - PM<sub>10</sub> particulate matter equal or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.
  - VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1.

NO<sub>x</sub> - total oxides of nitrogen

SO<sub>2</sub> - sulfur dioxide CO - carbon monoxide

HCHO - formaldehyde

MDI - methylene-diphenyl-diisocyanate

C<sub>6</sub>H<sub>5</sub>OH - phenol MeOH - methanol

- (4) Fugitive emissions are an estimate.
  - \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

A total maximum press daily throughput of  $\underline{1,636,250}$  ft<sup>2</sup> of waferboard (on 3/8-inch basis) and a total maximum annual plant throughput of  $\underline{465,000,000}$  ft<sup>2</sup> of 3/8-inch oriented strandboard processed.

- \*\* Maximum combined emissions for both RTOs.
- \*\*\* The thermal oil heaters vent to the atmosphere through this bypass stack only when these thermal oil heaters use natural gas as fuel.
- # Also counted as wood dust.
- ## These are not additional EPNs but represent emissions from EPNs S-1 and S-3/4, during emergency shutdown.
- ### VOC includes benzene.

VOCs on this MAERT are quantified as propane.
