#### Permit Number 40299

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

<sup>(1)</sup> Emission point identification - either specific equipment designation or emission point number from a plot plan.

NO<sub>x</sub> - total oxides of nitrogen

CO - carbon monoxide

SO<sub>2</sub> - sulfur dioxide

<sup>(2)</sup> Specific point source names. For fugitive sources use area name or fugitive source name.

<sup>(3)</sup> PM - particulate matter, suspended in the atmosphere, including  $PM_{10}$ 

 $PM_{10}$  - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

H<sub>2</sub>S - hydrogen sulfide

Permit Number 40299 Page 5

#### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (a) Emission rates are based on and the facilities are limited to an operating schedule of 876 hours/year.
- (b) Emission rates are based on and the facilities are limited to an operating schedule of 8,760 hours/year.
- (c) Emission rates are based on and the facilities are limited to an hourly throughput of 50 tons and an annual throughput of 7,990 tons of dried blood.
- (d) Emission rates are based on and the facilities are limited to an hourly throughput of 62 tons and an annual throughput of 13,500 tons of processed gel bone.
- (e) Emission rates are based on and the facilities are limited to an hourly throughput of 55 tons and an annual throughput of 59,000 tons of bone meal.
