### Permit Numbers 36644, PSD-TX-903, and N-007

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

#### AIR CONTAMINANTS DATA

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
  - NO<sub>x</sub> total oxides of nitrogen
  - SO<sub>2</sub> sulfur dioxide
  - $PM_{10}$  particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
  - CO carbon monoxide
  - H<sub>2</sub>SO<sub>4</sub> sulfuric acid
  - SO<sub>3</sub> sulfur trioxide
  - NH<sub>3</sub> ammonia

Permit Numbers 36644, PSD-TX-903, and N-007 Page 5

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) The VOC emissions rates from the cooling tower are <u>12.6</u> pounds per hour and <u>55.19</u> tons per year, including benzene. The VOC emission rates are for total VOC.
- (6) Emissions from the Fire Pump Diesel Engines are based on <u>26</u> hours per year operation. Non-emergency fire pump operations shall only occur between the hours of 8:00 a.m. and 5:00 p.m. (one engine at any one time).
- (7) These emissions are permitted under PSD or Nonattainment review in addition to State.

| * Emission rates are based on and the facilities are limited by the following maximum operating<br>schedule: |
|--|
| Hrs/day Days/weekWeeks/year or <u>8,760</u> Hrs/year. N-14, N-20A, and N-20B                                 |
| must operate according to the annual emission cap which may not allow for 8,760 hours of operation for all   |
| three emission points simultaneously.  |
