#### Permit Numbers 9654A, PSD-TX-684, and PSD-TX-833

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

#### AIR CONTAMINANTS DATA

Emission		Air Contaminant		n Rates *	
Point No. (1)	Name (2)	Name (3)	lb/hr TF		
212	Black Liquor Storage Cent	er VOC	0.38	1.34	
213	Ecofilter Pressure System	VOC	0.17	6.48	

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3)  $PM_{10}$  particulate matter (PM) equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.
  - VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO<sub>x</sub> - total oxides of nitrogen

SO<sub>2</sub> - sulfur dioxide

CO - carbon monoxide

TRS - total reduced sulfur

(4) Fugitive emissions are an estimate only.

All annual emissions are based on a rolling 12-month period and a maximum annual averaged throughput of <u>I,700</u> tons per day of air dry pulp.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24 Hrs/day, 7 Days/week, 52 Weeks/year

Dated	Septer	<u>mber 9,</u>	2002
