## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit No. 5876A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## AIR CONTAMINANTS DATA

Emission Point No. (1)	Source Name (2)	Air Contaminant Name (3)	Emission Rates * Ib/hr TPY		
SN7	Wood	Chip Stockpiles (4)	TSP PM <sub>10</sub>	0.75 0.36	1.14 0.55
SN5	Wood	Chip Handling (4) (5)	TSP PM <sub>10</sub>	0.14 0.07	0.11 0.06

- (1) Emission point identification either specific equipment designation emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP total suspended particulate matter (includes PM10)  $PM_{10}$  particulate matter less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) This estimate includes two truck dumps, front end loaders drop to hopper, one rail car dump, five conveyor drops, and two screens.
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day 24 Days/week 7 Weeks/year 52

Emission rates are based on and the facilities are limited by the following maximum throughput rates:

<u>Materials</u>	<u>Tons/hour</u>	<u>Tons/year</u>
hardwood chips	950	650,000
softwood chips	950	890,000
