Emission Sources - Maximum Allowable Emission Rates

Permit Number 99011

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

Emission Sources - Maximum Allowable Emission Rates

(2) Specific point source name. For fugitive sources, use area name or fugitive source name.

(3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which

have been excluded from the definition of volatile organic compound.

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1 - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM₂₅, as PM

represented

 PM_{10} - total particulate matter equal to or less than 10 microns in diameter, including PM_{2.5}, as

represented

- particulate matter equal to or less than 2.5 microns in diameter $PM_{2.5}$

- hazardous air pollutant as listed in § 112(b) of the Federal Clean Air Act or Title 40 HAP

Code of Federal Regulations Part 63, Subpart C

(4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.

(5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.

(6) The allowable emission rates include planned maintenance, startup, and shutdown activities.
