Permit No. 19566/PSD-TX-768M1

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

schedule:

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) TPY rate is based on operating 336 hours/year (rolling annual basis) with the stack burner/thermal oxidizer down.
- (6) Heaters B-7001 and B-7002 share a common stack.
- (7) Heaters B-7101-4 and B-7201 share a common stack.
- (8) Emission limit prior to equipping the tank with an internal floating roof (IFR) or equivalent.
- (9) Emission limit after January 1, 1999, or after equipping the tank with an IFR or equivalent, whichever occurs first.

Emission rates are based on and the facilities are limited by the following maximum operating

Hrs/day___Days/week___Weeks/year___or Hrs/year<u>8,760</u>
