Permit Number 47029

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code ' 101.1

NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed,

it shall be assumed that no particulate matter greater than 10 microns is emitted.

CO - carbon monoxide
HCl - hydrogen chloride

AN - acrylonitrile
ACI - allylchloride
EtOH - ethanol

PO - propylene oxide

PO-HCl - propylene oxide-hydrochloric acid complex

 NH_3 - ammonia Si - silicon

SiO₂ - silicon dioxide

Cl₂ - chlorine

SiCl₄ - silicon tetrachloride HSiCl₃ - trichlorosilane H₂S - hydrogen sulfide Na₂S - sodium sulfide MeOH - methyl alcohol

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
