#### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit No. 5572B

AIR

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in General Rule 101.1
  - $PM_{10}$  particulate matter equal to or less than 10 microns in diameter
  - NO<sub>x</sub> total oxides of nitrogen
  - SO<sub>2</sub> sulfur dioxide
  - CO carbon monoxide
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
  - \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrc	/day 24	Days/week 7	Weeks/year 52	or Hrs/year 8,760
$\Pi \cup S$	/uay 2 <del>4</del>	Days/Week /	weeks/year 32	UI HIS/ YEAI 0,700
