## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

## Permit No. 5107A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

### AIR CONTAMINANTS DATA

| Emission      | Source  | Air Contaminant  | <u>Emissio</u>                                | n Rates *                                     |

### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

#### AIR CONTAMINANTS DATA

| Emission      | Source                | Air Contaminant | <u>Emissio</u> | Emission Rates * |  |
|---------------|-----------------------|-----------------|----------------|------------------|--|
| Point No. (1) | Name (2)              | Name (3)        | lb/hr          | <u>TPY</u>       |  |
| BOOTH-1       | Paint Booth No. 1 (5) | TSP             | 0.62           | 1.28             |  |
|               | , ,                   | $PM_{10}$       | 0.62           | 1.28             |  |
|               |                       | VOC             | 0.06           | 0.13             |  |

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP -total suspended particulate including PM<sub>10</sub>
  - PM<sub>10</sub> particulate matter less than 10 microns in diameter
  - VOC volatile organic compounds as defined in General Rule 101.1
  - NO<sub>x</sub> total oxides of nitrogen
  - SO<sub>2</sub> sulfur dioxide
  - CO carbon monoxide
- (4) These emissions can exit any or all of the above stacks.
- (5) These emissions are authorized by TNRCC standard exemption and emission rates are estimates.
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:

Hrs/day 24 Days/week 7 Weeks/year 52 or Hrs/year 8,760

Maximum hourly carbon steel castings production of 10 tons and a maximum annual carbon steel castings production of 18,790 tons.

Maximum usage rates of 2,700 tons per year (TPY) core sand.
