EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 2399

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission *	Source	Air Contaminant	<u>Emissio</u>	n Rates
Point No. (1)	Name (2)	Name (3)	1b/hr	TPY
LHS307	Coal Stockpile Wind Erosion and Maintenance (4)	TSP PM ₁₀	27.62 9.46	17.32 5.39
L3DSP	Coal Stockpile Wind Erosion and Maintenance (4)	TSP PM ₁₀	22.13 6.81	10.69 2.84

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP total suspended particulate including PM_{10} PM_{10} particulate matter less than 10 microns in diameter (may be equal to TSP if otherwise not listed)
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
