EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 4036A

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Speciated emissions are included in total VOC emissions.

* EFR - external floating roof EFR/GD - EFR with geodesic dome

FXR - fixed roof

IFR - internal floating roof

** Emission rates are based on and the facilities are limited by the following maximum operating schedule:
