Permit Number 48982

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission	Source	Air Contaminant	Emission Rates *		
Point No. (1)	Name (2)	Name (3)	lb/hr	TPY**	
91FUG	300-Group Tank Farm Fugitives (4)	VOC	0.78	3.43	
	After 12/31/2006	VOC	0.73	3.21	

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code $^{\prime}$ 101.1 NO $_{x}$ total oxides of nitrogen

CO - carbon monoxide

SO₂ - sulfur dioxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀.

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Boiler No. 12 is authorized to be returned to service and operated for a period not to exceed 336 hours during May and June 2007.

*	Emission ra schedule:	ites are	based	on a	ınd the	facilities	are	limited	by	the	following	maximum	operating
	Hrs/day	Day	s/week		Weeks/	year or _	<u>8,76</u>	<u>0</u> Hrs/y	/ear				

** Compliance with annual emission limits is based on a rolling 12-month period.

Dated	July 8	, 2009
