### Permit Number 21918

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

| <b>Emission Point No. (1)</b> | Source Name (2)      | Air Contaminant Name (3)  | Emission Rates |         |
|-------------------------------|----------------------|---------------------------|----------------|---------|
|                               |                      |                           | lbs/hour       | TPY (4) |

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO<sub>x</sub> - total oxides of nitrogen

SO<sub>2</sub> - sulfur dioxide

PM - total particulate matter, suspended in the atmosphere, including PM<sub>10</sub> and PM<sub>2.5</sub>, as represented

CO - carbon monoxide

H<sub>2</sub>S - hydrogen sulfide

- (4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (5) The VOC hourly caps are restricted on a pollutant by pollutant basis.
- (6) Total hourly emissions of any single compound listed on Approved Chemical List, Group A from the sources listed on Attachment C, Emission Caps List, are restricted to this emission rate.
- (7) Total VOC emissions from all sources listed on Attachment C, Emissions Caps List, are restricted to the annual value represented under the VOC cap.
- (8) Total hourly emissions of any single compound listed on Approved Chemical List, Group B from the sources listed on Attachment C. Emissions Cap List, are restricted to this emission rate.
- (9) Total hourly emissions of any single compound listed on Approved Chemical List, Group C from the sources listed on Attachment C, Emissions Cap List, are restricted to this emission rate.
- (10) Total hourly emissions of any single compound listed on Approved Chemical List, Group D from the sources listed on Attachment C, Emissions Cap List, are restricted to this emission rate.
- (11) Total hourly emissions of this compound from the sources listed on Attachment C, Emissions Caps List, are restricted to this emission rate.
- (12) Acetone is used as part of an automatic cleaning sequence for certain types of on-line analyzers employed in various locations throughout the facility.
- (13) This permit authorizes emissions which the company has represented for maintenance, startup, and shutdown activities associated with Sulfolene processing: Shutdown of Sulfolene unit. These shutdown events shall not exceed 12 events per rolling 12 months, or a total of 3 hours per year. A record shall be made of each shutdown event.
- (14) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations.
