Flexible Permit Number 6618

This table lists the maximum allowable emission caps or rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission	Source	Air Contaminant	Emission F	Rates *
Point No. (1)	Name (2)	Name (3)	lb/hr	TPY**
Q4501	Plant Flare	NO _x , CO, SO ₂

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) NO_x total oxides of nitrogen

CO - carbon monoxide

SO₂ - sulfur dioxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀

PM₁₀ - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall be assumed that no PM greater than 10 microns is emitted.

NH₃ - ammonia

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

AN - acrylonitrile

MAA - methacrylic acid

CS₂ - carbon disulfide

H₂SO₄ - sulfuric acid

Cl₂ - chlorine

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) These sources were idled and the associated emissions were removed from the emissions caps by three permit alterations approved January 2002, May 2002, and February 2003.
- * Emission rates are based on a continuous operating schedule <u>24</u> hours/day <u>7</u> days/week <u>52</u> weeks/year.
- ** Compliance with annual emission caps and annual individual emission limitations is based on a rolling 12-month period.
