EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 7264

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number (EPN) from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

 N_2H_4 - hydrazine HNO_3 - nitric acid

BF₃ - boron trifluoride

NH₃ - ammonia

PM - particulate matter, suspended in the atmosphere, including PM_{10} - particulate matter equal to or less than 10 microns in diameter $PM_{2.5}$ - particulate matter equal to or less than 2.5 microns in diameter

SO₂ - sulfur dioxide

NO_x - total oxides of nitrogen

CO - carbon monoxide

- (4) Emission rate is an estimate and compliance is demonstrated by meeting the requirements of the applicable special conditions and permit application representations.
- (5) The combined annual emissions of all pollutants except PM from the incinerator and flare will not exceed the total annual allowable emissions of FLARE EPN X-402.
- (6) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.
- (7) These emission rates are authorized using a 28 RCT leak detection and repair program, until 180-days from the date of the issuance of the March 31, 2011, permit amendment application.
- (8) These emission rates are authorized using a 28 MID leak detection and repair program, and will become effective 180-days after the issuance of the March 31, 2011, permit amendment application.
