Permit No. 20365 and PSD-TX-785M4

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

F100/101	Effluent Treatment System (4)	VOC	-	5.72

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) TSP particulate matter including PM_{10} .

 PM_{10} - particulate matter less than 10 microns

VOC - volatile organic compounds as defined in General Rule 101.1

 NO_x - total oxides of nitrogen

 SO_2 - sulfur dioxide

CO - carbon monoxide

TRS - total reduced sulfur

Cl₂ - chlorine

ClO₂ - chlorine dioxide

H₂SO₄ - sulfuric acid

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Based on a maximum 12-month calendar year average throughput 2,400 tons per day of bleached air dry pulp.

Permit No. 20365 and PSD-TX-785M4 Page 11
