## Emission Sources - Maximum Allowable Emission Rates

## Permit Number 18441

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

| Emission Point<br>No. (1) | Source Name (2)          | Air Contaminant Name (3) | Emission Rates (5) * |        |
|---------------------------|--------------------------|--------------------------|----------------------|--------|
|                           |                          |                          | lbs/hour             | TPY    |
| 1                         | Baghouse Stack           | PM <sub>10</sub>         | 14.76                | 9.02   |
|                           |                          | VOC (a)                  | 14.40                | 8.80   |
|                           |                          | VOC (b)                  | 218.75               | 32.81  |
|                           |                          | VOC (c)                  | 50.85                | 2.83   |
|                           |                          | NO <sub>x</sub>          | 24.75                | 15.13  |
|                           |                          | SO <sub>2</sub>          | 26.10                | 15.95  |
|                           |                          | СО                       | 58.50                | 35.75  |
| 5                         | Asphalt Heater Vent (4)  | PM <sub>10</sub>         | 0.042                | 0.12   |
|                           |                          | VOC                      | < 0.01               | < 0.01 |
|                           |                          | NO <sub>x</sub>          | 0.12                 | 0.35   |
|                           |                          | SO <sub>2</sub>          | 0.36                 | 1.05   |
|                           |                          | СО                       | 0.03                 | 0.09   |
| 2                         | Lime Storage Silo (4)    | PM <sub>10</sub>         | 0.05                 | 0.01   |
| 6                         | Storage Silo Filling (4) | PM <sub>10</sub>         | 0.26                 | 0.16   |
|                           |                          | VOC                      | 5.48                 | 3.35   |
|                           |                          | СО                       | 0.53                 | 0.32   |
| 7                         | Truck Load-Out           | PM <sub>10</sub>         | 0.23                 | 0.14   |
|                           |                          | VOC                      | 1.87                 | 1.14   |

## Page 2

## Emission Sources - Maximum Allowable Emission Rates

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) CO carbon monoxide

NO<sub>x</sub> - total oxides of nitrogen

PM - total particulate matter, suspended in the atmosphere, including  $PM_{10}$  and  $PM_{2.5}$ , as represented

 $PM_{10}$  - total particulate matter equal to or less than 10 microns in diameter, including  $PM_{2.5}$ , as represented

SO<sub>2</sub> - sulfur dioxide

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

VOC(a) - mainly asphalt vapors from standard mix

VOC(b) - primarily diesel or kerosene vapors from cold mix

VOC(c) - VOCs from rubber modified mix

- (4) Fugitive emissions are an estimate only.
- (5) Planned startup and shutdown emissions are included. Maintenance activities are not authorized by this permit.
  - \* Emission rates are based on and the facilities are limited by the following maximum operating schedule and production rates:

12 Hrs/day 6 Days/week 50 Weeks/year or Hrs/year

Standard Hot Mix: 450 Tons/hour 425,000 Tons/year Standard Hot Mix with Rubber: 450 Tons/hour 50,000 Tons/year Cold Mix with Emulsion: 250 Tons/hour 75,000 Tons/year

Date: January 25, 2013

Project Number: 186604
