Permit No. 6289 and PSD-TX-76M7

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

Emission Source		Air Contaminant	Emission Rates *		
Point No. (1)	Name (2)	Name (3)	lb/hr (4)	TPY	
BDS-5	Barge Dock Scrubber	VOC	1.03	0.71

WW-1	Wastewater Treatment	VOC		0.50

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) PM₁₀ particulate matter < 10 microns
 - VOC volatile organic compounds as defined in General Rule 101.1
 - NO_x total oxides of nitrogen
 - SO₂ sulfur dioxide
 - CO carbon monoxide
 - HCN hydrogen cyanide
 - NH₃ ammonia
- (4) Hourly emissions are based on clock hour averages
- (5) Annual emissions for AOGIBs No. 1 and No. 2 are combined because of the waste streams used for fuel and allow for the possibility that more of the waste stream may be fired in one boiler than the other.
- (6) Hourly rate is maximum for each tank and annual rate is the combined total for all similar tanks
- (7) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
