Permit Number 3855B

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1)	Emission po	int identification	- either	specific	equipment	designation	or	emission	point nu	umbei
	(EPN) from p	olot plan.								

(2) Specific point source name. For fugitive sources use area name or fugitive source name.

(3) VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

HCl - hydrogen chloride

VCM - vinyl chloride monomer

Cl₂ - chlorine

PM - particulate matter, suspended in the atmosphere, including PM₁₀.

 PM_{10} - particulate matter less than 10 microns in diameter. Where PM is not listed, it shall

be

assumed that no PM greater than 10 microns is emitted.

SO₂ - sulfur dioxide

NO_x - total oxides of nitrogen CO - carbon monoxide EDC - ethylene dichloride

CHCL₃ - chloroform

NaOH - sodium hydroxide

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Maintenance operations only. Emissions from these EPNs are only from these permitted facilities.

*	Emission	rates	are	based	on	and	the	facilities	are	limited	by	the	following	maximum	operating
	schedule:														

Hrs/day Days/week	Weeks/year or <u>8,760</u> Hrs/year
-------------------	-------------------------------------

** Compliance with annual emission limits is based on a rolling 12-month period.

Dated <u>December 22, 2009</u>
