Permit No. 9654A, PSD-TX-684, and PSD-TX-833

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Emission	Source	Air Contaminant	Emission Rates *

<sup>(1)</sup> Emission point identification - either specific equipment designation or emission point number from plot plan.

<sup>(2)</sup> Specific point source name. For fugitive sources use area name or fugitive source name.

Permit No. 9654A, PSD-TX-684, and PSD-TX-833 Page 6

#### EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

(3) PM<sub>10</sub> - particulate matter less than 10 microns

VOC - volatile organic compounds as defined in 30 Texas Administrative Code Section 101.1

NO<sub>X</sub> - total oxides of nitrogen

SO<sub>2</sub> - sulfur dioxide

CO - carbon monoxide

TRS - total reduced sulfur

(4) Fugitive emissions are an estimate only.

All annual emissions are based on a rolling 12-month period and a maximum annual averaged throughput of I,700 tons per day of air dry pulp.

\* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

<u>24</u> Hrs/day, <u>7</u> Days/week, <u>52</u> Weeks/year

Dated October 4, 2000
