### Permit Number 19546

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1
  - NO<sub>x</sub> total oxides of nitrogen
  - CO carbon monoxide
  - SO<sub>2</sub> sulfur dioxide
  - $PM_{10}$  particulate matter equal to or less than 10 microns in diameter
- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Total maximum VOC emissions from these points shall not exceed 2 pounds per hour (lbs/hr) or 2.5 tons per year.
- (6) Emissions limited to no more than 5 hours during each product type changeover and is an extension of the lb/hr limitation only.
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

	Hrs/day Days/week Weeks/year or <u>8,760</u> Hrs/year
** Compliance with annual emission limits is based on a rolling 12-month period.
