Emission Sources - Maximum Allowable Emission Rates

Permit Number 80892

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

⁽¹⁾ Emission point identification - either specific equipment designation or emission point number from plot plan.

Project Number: 184854

⁽²⁾ Specific point source name. For fugitive sources, use area name or fugitive source name.

⁽³⁾ NO_x - total oxides of nitrogen

Emission Sources - Maximum Allowable Emission Rates

SO₂ - sulfur dioxide CO - carbon monoxide

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

PM - particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}.

 PM_{10} - particulate matter equal to or less than 10 microns in diameter. Where PM is not listed, it shall

be assumed that no PM greater than 10 microns is emitted.

PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter.

 H_2SO_4 - sulfuric acid mist NaOH - sodium hydroxide

NH₃ - ammonia

HC1 - hydrogen chloride

Pb - lead

(4) Compliance with annual emission limits (tons per year) is based on a 12 month rolling period.

(5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
