#### Permit No. 9074

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) NO<sub>x</sub> total oxides of nitrogen
  - CO carbon monoxide
  - FC fluorocarbons
  - HCI hydrogen chloride
  - HF hydrogen fluoride
  - Cl<sub>2</sub> chlorine
  - PM particulate matter
  - SO<sub>2</sub> sulfur dioxide

- (4) These emission rates are allowable through March 31, 1994.
- (5) These emission rates are allowable after March 31, 1994.
- (6) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (7) These emission rates are allowable after December 31, 1993.
- (8) These emission rates for EPN 225 are allowable through April 15, 1994. The allowable short-term emission rate during loading operations is as specified in the table above. The annual

allowable rate reflects emissions associated with loading operations as well as with episodes of start-up and purging maintenance; during these episodes, the allowable short-term emissions are as follows:

Start-up: 139.64 lb/hr of FC

Purging maintenance: 219.3 lb/hr of FC

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

(9)	These emission rates are allowable through April 15, 1994.
