Permit Number 32769 and PSDTX1258M4

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

Air Contaminants Data

| Emission Point | Source Name (2) | Air Contaminant | Emissio | Emission Rates | |
|----------------|-------------------------------|-----------------------|---|----------------|--|
| No. (1) | | Name (3) | lbs/hour | TPY (4) | |

- (1) Emission point identification either specific equipment designation or emission point number from plot plan.
- (2) Specific point source name. For fugitive sources, use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide

PM - total particulate matter, suspended in the atmosphere, including PM₁₀ and PM_{2.5}, as represented

PM₁₀ - total particulate matter equal to or less than 10 microns in diameter, including PM_{2.5}, as

represented

PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter

CO - carbon monoxide H₂S - hydrogen sulfide

- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) Emission rate is an estimate and is enforceable through compliance with the applicable special condition(s) and permit application representations.
- (6) Maximum hourly emissions are limited to the maximum hourly emissions authorized for each loading arm (B-2A and B-2B) for EPN VCU-3.
- (7) Cap applies to total emissions for the following EPNs: B-1, B-15 and B-16.
- (8) Cap applies to total emissions for the following EPNs: VCU-2, 3, 4, and 5.EPN VCU 2 includes Refined products from Oil Dock 2 Loading Arm B-2A and Oil Dock 2-Crude/Condensate from Oil Dock 2 Loading Arm B-2B.
- (9) Applies to FINs: S-200M4, S-200M5 and S-200M6. Total emissions include the products of combustion of controlled MSS activities plus pilot/assist gas emissions; tank MSS will not occur simultaneously for more than one tank.
- (10) Applies to FINs: S-100M1, S-100M2, S-100M3, S-100M4, S-100M5, S-100M6, S-100M7, S-100M8 and S-100M9. Total emissions include the products of combustion of controlled MSS activities; tank MSS will not occur simultaneously for more than one tank.
