Permit Number 17973

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities, sources, and related activities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

(1) Emission point identification - either specific equipment designation or emission point number from plot plan.

STP - Stack, Paint Booth
SVT - Scrubber Vent

STF - Stack, Bag Filter, Cyclone, or Dust Collector STO - Stack, Other (Adhesive Booth, Fluidized Bed, etc.)

(F) - Fugitive Emissions, no centralized stack or point of emission

(2) Specific point source name. For fugitive sources, use area name or fugitive source name.

(3) Exempt Solvent - Those carbon compounds or mixtures of carbon compounds used as solvents which have been excluded from the definition of volatile organic compound.

VOC - volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide

PM - total particulate matter, suspended in the atmosphere, including PM_{10} and $PM_{2.5}$, PM_{10} - total particulate matter equal to or less than 10 microns in diameter, including $PM_{2.5}$,

PM_{2.5} - particulate matter equal to or less than 2.5 microns in diameter

CO - carbon monoxide HCI - hydrogen chloride

- (4) Compliance with annual emission limits (tons per year) is based on a 12-month rolling period.
- (5) The allowable emission rates include planned maintenance, startup, and shutdown activities.
- (6) Combustion emissions.
- The combined allowable VOC emission rate for these sources is 291.29 tons per year (tpy).
- ** The combined allowable PM₁₀/PM_{2.5} emission rate for these sources is 1.59 tpy.
- *** The combined allowable ES emission rate for these sources is 156.63 tpy.
