Permit Numbers 20365 and PSD-TX-785M6

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1. The hazardous air pollutants (HAPs) are included in VOC. Speciated HAP emission rates are represented in permit file.
 - CO carbon monoxide

PM - particulate matter, suspended in the atmosphere, including PM₁₀

 PM_{10} - particulate matter less than or equal to 10 microns in diameter. Where PM is not listed, it shall be assumed that no particulate matter greater than 10 microns is emitted.

SO₂ - sulfur dioxide

H₂SO₄ - sulfuric acid

H₂S - hyrdrogen sulfide NO_x - nitrogen oxides

TRS - total reduced sulfur

HCI - hydrochloric acid

Be - beryllium

Pb - lead

Hg - mercury

- (4) Fugitive emissions are an estimate only.
- (5) During routine maintenance, startup and shutdown activities only for a maximum of 10 hours per occurrence.

*	Emission rates	are	based	on	and	the	facilities	are	limited	by	the	following	maximum	operating
	schedule:													

Hrs/day	Days/week _	Weeks/year	or Hrs/year	8,760
---------	-------------	------------	-------------	-------

Hourly emissions are based on 12-hour averages as indicated in Special Condition Nos. 5 and 16.

Dated <u>January 24, 2007</u>
