EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit No. 17396

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

AIR CONTAMINANTS DATA

		AIR CONT	AMINAN 13 DA	ATA
Emission	Source	Air Contaminant	Emission Rates *	
Point No. (1)	Name (2) Name (3)	lb/hr TPY

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

or emission point

(1) Emission point identification - either specific equipment designation

nber from plot plan.						
Specific point source name. For fugitive sources use area name or	fugitive source name.					
TSP - total suspended particulate matter (including PM10)						
PM10 - particulate matter less than 10 microns						
Fugitive emissions are an estimate only and should not be consider allowable emission rate.	ed as a maximum					
* Emission rates are based on and the facilities are limited by the following maximum operating						
schedule and production rates:						
Hrs/day 10 Days/week 5.5 Weeks/year 52 or Hrs/year						
Stone and sand production: Tons/hour_750_ Tons/year_1,700,000						
Revised						
	Specific point source name. For fugitive sources use area name or TSP - total suspended particulate matter (including PM10) PM10 - particulate matter less than 10 microns Fugitive emissions are an estimate only and should not be consider allowable emission rate. Emission rates are based on and the facilities are limited by the followin schedule and production rates: Hrs/day 10 Days/week 5.5 Weeks/year 52 or Hrs/year
