## Permit No. 105

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

## AIR CONTAMINANTS DATA

## EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

(1)	Emission point identification - either specific equipment designation or emission poin
	number from plot plan.

- (2) Specific point source name. For fugitive sources use area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in General Rule 101.1

NOx - total oxides of nitrogen

CO - carbon monoxide

NCVOC- non hydrogen cyanide volatile organic compounds

HCN - hydrogen cyanide

H2SO4- sulfuric acid

- (4) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (5) Emissions occur two weeks per year.
- \* Emission rates are based on and the facilities are limited by the following maximum operating schedule:

Hrs/day	_Days/week	Weeks/year	_or Hrs/y	/ear	8,760
