EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

Permit Number 19681 and PSDTX771

This table lists the maximum allowable emission rates and all sources of air contaminants on the applicant's property covered by this permit. The emission rates shown are those derived from information submitted as part of the application for permit and are the maximum rates allowed for these facilities. Any proposed increase in emission rates may require an application for a modification of the facilities covered by this permit.

EMISSION SOURCES - MAXIMUM ALLOWABLE EMISSION RATES

- (1) Emission point identification either specific equipment designation or emission point number from a plot plan.
- (2) Specific point source names. For fugitive sources, use an area name or fugitive source name.
- (3) VOC volatile organic compounds as defined in Title 30 Texas Administrative Code § 101.1

NO_x - total oxides of nitrogen

SO₂ - sulfur dioxide

PM₁₀ - particulate matter equal to or less than 10 microns in diameter

CO - carbon monoxide

- (4) Planned maintenance and startup emissions are defined in the special conditions. Planned short-term and long-term maintenance and startup emissions (TPY) are included in the annual routine emission rates.
- (5) Fugitive emissions are an estimate only and should not be considered as a maximum allowable emission rate.
- (6) TPY rates are based upon average production rate from the Polyvinyl Alcohol Plant (Sekisui Special Chemicals America Vent Gas Stream).
- (7) Insignificant Activities emissions are defined in the special conditions.
- * Emission rates are based on and the facilities are limited by the following maximum operating schedule:

24_Hrs/day 7_Days/week 52_Weeks/year or 8,760_Hrs/year

** Compliance with annual emission limits is based on a rolling 12-month period.
